

# THE JOURNAL OF NUTRITION

August 2005

Volume 135 No. 8

ISSN-0022-3166

Official Publication  
American Society for Nutritional Sciences  
Published online at [www.nutrition.org](http://www.nutrition.org)

## Issue Highlights:

### Review-

Combination diet and exercise interventions for the treatment of dyslipidemia

### Articles-

Hyperhomocysteinemia, folic acid supplementation, and coagulation factor activity

Vitamin E and vasodilator prostanoids in human aortic endothelial cells

Transcriptome analysis of Caco-2 cells exposed to sulforaphane

Complementary feeding with cows' milk and sleeping metabolic rate in breast-fed infants

Additive effects of dietary protein and exercise on body composition during weight loss in adult women

Nutritional vulnerability of homeless youth in Toronto

Adaptation to high-fat diet, hyperphagia and sensitivity to cholecystokinin in rats

Long chain (n-3) PUFA exposure and electroretinogram responses of puppies

Low protein diet and PKA $\alpha$  expression in pancreatic islets of pregnant rats

Influence of diet on intestinal metabolism and morphology in senior and young adult dogs

Early childhood development interventions and cognitive development of young children in rural Vietnam

Dietary fat intake, psychosocial and cognitive functioning of school-aged children in the U.S.

Polymorphisms affecting the risk of cardiovascular disease in men  
Hemoglobin and ferritin as indicators of population response to iron interventions

Detection of conversion of D-Met into L-Met by stable isotope methodology

Challenges and opportunities for support of nutritional science conferences at NIH

### Supplement-

Lycopene/tomato supplementation and cancer prevention
